SUMMARY

I'm a dedicated and detail-oriented web developer with a solid foundation in full-stack development. Over the past year, I've built and deployed several real-world projects that reflect both technical ability and an understanding of user-centric design. I enjoy working with modern frameworks like React and Node.js to create responsive, scalable applications. I'm currently seeking opportunities where I can contribute to meaningful products while continuing to grow as a developer.

SKILLS

Frontend: HTML, CSS, JavaScript (ES6+), TypeScript, React.js, Tailwind CSS, Firebase

Backend: Node.js, Express.js, MongoDB, Mongoose, JWT, REST APIs, Bcrypt

Tools & Workflow: Git & GitHub, Postman, Chrome DevTools

Familiar With: Context API, Multer, Cloudinary, SQL, PostgreSQL

PROJECTS

TasteBite – Restaurant Management Web App (React)

- A comprehensive restaurant management system built with React that showcases advanced frontend development skills. This responsive web application features intuitive menu browsing, realtime order tracking, and a dynamic loyalty program interface. The project demonstrates my expertise in component architecture, state management, and creating engaging user experiences that solve real business challenges.

Youtube Clone (Backend) - Authentication + Video Platform (Node.js)

- A youtube backend application which handles authentication, video upload, like, dislike, comment, view, subscription, playlist, channel. This application was created using NodeJs, Express, MongoDB, Mongoose, JWT, Bcrypt, Multer, Cloudinary.
- [Codebase](#)

EstateHub – Real Estate Marketplace (React)

- A comprehensive real estate marketplace web application built with modern React technologies, enabling users to browse, search, and manage properties with advanced features for buyers, sellers, and agents. The application provides an intuitive interface for property discovery, detailed property information, agent management tools, and user profile customization.
